

# Research Assistant Needed

The Department of Ecology and Evolutionary Biology at the University of Connecticut is seeking a Research Assistant II, 50% time to work in the Jockusch lab. In this position, time will be devoted to assisting and providing research support for an on-going project investigating the genetics and development of antenna structure in *Tribolium* flour beetles. Responsibilities include microinjection, maintenance of beetle stocks, dissection and fixation of embryos and tissue, and laboratory maintenance, as well as administrative duties as required.

## Minimum Acceptable Qualifications and Skills:

- BS with 2-3 years of relevant experience, or MS in the biological sciences (Salary is commensurate with experience)

## Desirable Qualifications and Skills:

- Previous laboratory experience in molecular biology
- Experience in microinjection a plus
- Good interpersonal, written, and verbal communication skills
- Attention to detail

Review of applications will begin on March 17, 2006 and continue until the position is filled. Please send a cover letter, resume, and contact information for three references to:
