

eHRAF Archaeology Complete Collection List (August 2009 Installments 1-9)

The traditions in *eHRAF Archaeology* are selected from the *Outline of Archaeological Traditions (OAT)* (2001, revised 2005) compiled by Peter N. Peregrine with the help of a Board of Advisors. The OAT attempted to catalogue all known prehistoric archaeological traditions. By an archaeological tradition is meant “a group of populations sharing similar subsistence practices, technology, and forms of socio-political organization, which are spatially contiguous over a relatively large area and which endure temporally for a relatively long period” (Peregrine 2005, iv).

The intent of the *eHRAF Collection of Archaeology* is to provide information on archaeological traditions for two purposes. The first is to provide a set of traditions that are representative of the world’s archaeological traditions. The traditions checked in the column labeled “SRS” were randomly sampled from the OAT. SRS is short for a “simple random sample.” The second purpose is to provide complete sequences for selected world regions. We have begun with the sequences leading to early civilizations. eHRAF Archaeology currently includes the Highland Andean sequence, the Mayan sequence, the Egyptian sequence and part of the Mesopotamian sequence.

The approximate beginning and end time periods are given for each archaeological tradition. BP stands for “before the present” where the present, following the OAT, is the year AD 2000.

eHRAF Collection of Archaeology (Complete Collection List)
