

In support of Yale Emergency Management, Yale University Procurement has posted a link to frequently purchased health and safety products, and where to get the best deals through SciQuest.

For your convenience, these “best value” products have been stored in SciQuest in a University folder. From the SciQuest homepage, click on Go to “favorites” then click “Shared”. Here you will find the University’s contract items for gloves, kimwipes, disinfectants and hand sanitizer. Click [here](#) to view some of the health Safety products available through SciQuest

The preferred method for purchasing products at Yale is SciQuest (Yale’s electronic Procurement solution). Access to SciQuest can be granted by Business Offices via the START system.
