

ITS/Procurement collaboration saves money on consolidated software purchase!

Thanks to collaborative efforts between Yale's ITS and Procurement, SnagIt users benefitted from considerable savings when license purchases were consolidated. By doing so the university was able to leverage its buying power to purchase 144 licenses in bulk and save thousands of dollars.

Users were asked to express interest in the purchase by contacting the ITBuy ListServ. Each year, Yale partners with dozens of software vendors to provide a growing number of applications to members of the community. As new packages are negotiated, information regarding eligibility and participation in different licensing agreements are posted to www.yale.edu/its/software/

If there are particular software titles you'd like to see available, please contact software@yale.edu. If you'd like to join the ITBuy Listserv, please contact stephen.arnold@yale.edu
