The purpose of this conference is to facilitate communication and exchange of ideas between researchers from the public health and disease ecology communities who are working on zoonotic pathogens of humans. The format consists of a forum with formal presentations on Friday, April 3<sup>rd</sup>, and a workshop with informal presentations and discussion on Saturday, April 4<sup>th</sup>. It is open to the Yale community and the public and will be recorded and available on the Center's website at <http://www.yale.edu/yibs/research/CEE>. Topics include the ecology and epidemiology of some of the most important pathogens transmitted to humans from wildlife.
